

Comments on "Exposure to Grocery Prices and  
Inflation Expectations" by D'Acunto, Malmendier,  
Ospina and Weber

Discussant: Fernando Borraz - Banco Central del Uruguay

CEMLA - 2020

# Summary

- Very well written and motivated paper. I enjoyed reading it

## Summary

- Very well written and motivated paper. I enjoyed reading it
- Impressive analysis of household expenditures (Q and P)

## Summary

- Very well written and motivated paper. I enjoyed reading it
- Impressive analysis of household expenditures (Q and P)
- Policy relevant topic

## Summary

- Very well written and motivated paper. I enjoyed reading it
- Impressive analysis of household expenditures (Q and P)
- Policy relevant topic
- $\Delta$ Prices of goods that HH buy  $\implies \Delta$ HH Inflation expectations

## Comment I

- It's hard to give suggestions after comments from editor and four referees. A lots of robustness checks in the paper .....

## Comment I

- It's hard to give suggestions after comments from editor and four referees. A lots of robustness checks in the paper .....
- More explanation of the data. Only two waves of expectations. Average price for the UPC and not individual prices (for stores with point of sales). Sales?

## Comment I

- It's hard to give suggestions after comments from editor and four referees. A lots of robustness checks in the paper .....
- More explanation of the data. Only two waves of expectations. Average price for the UPC and not individual prices (for stores with point of sales). Sales?
- Gasoline prices at the county level as exploratory variable?

## Comment I

- It's hard to give suggestions after comments from editor and four referees. A lots of robustness checks in the paper .....
- More explanation of the data. Only two waves of expectations. Average price for the UPC and not individual prices (for stores with point of sales). Sales?
- Gasoline prices at the county level as exploratory variable?
- Consumers who change stores/goods to buy cheaper?

## Comment II

- Time-HH FE? Grocery stores FE?

## Comment II

- Time-HH FE? Grocery stores FE?
- Level of financial and economic information of households

## Comment II

- Time-HH FE? Grocery stores FE?
- Level of financial and economic information of households
- Placebo exercises: HHs similar to "professional forecasters". Financial sector?

## Comment II

- Time-HH FE? Grocery stores FE?
- Level of financial and economic information of households
- Placebo exercises: HHs similar to "professional forecasters". Financial sector?
- Clustered standard errors at the HH-time-county
