

# CHALLENGES AND OPPORTUNITIES FOR INTERNATIONAL RESERVE MANAGERS AFTER THE MONETARY RESPONSE TO COVID

#### Emiliano González Mota

**Director – Operations Department** 

XIV (DIGITAL) MEETING ON INTERNATIONAL RESERVES MANAGEMENT

CEMLA AND BANCO DE MEXICO

April 14<sup>th</sup>, 2021

**OPERATIONS DEPARTMENT** 

# **ECONOMIC EFFECTS OF COVID-19 IN THE EURO AREA**

The COVID-19 pandemic provoked an unprecedent contraction of activity in 2020, and a reduction of inflation expectation not seen since the sovereign debt crisis.

Real GDP (% y-o-y) Harmonised Inflation (% y-o-y) 2,5 4 2 2,0 0 Target 1,5 -2 -4 1,0 -6 0,5 -8 -10 0,0 -12 -0,5 -14 -1,0 -16 2013 2017 2021 2013 2014 2015 2016 2017 2018 2019 2020 2021 2014 2015 2016 2018 2019 2020

#### **OPERATIONS DEPARTMENT**

- Challenging typical reserve management:
  - Lower expected returns
  - Higher tolerance for both market and credit risks in a (still) low volatility context

### Reinforcing the need for:

- Defensive strategies: lower duration & HTM portfolios, FRNs, TIPS, +MM activity
- Keep on diversification efforts (assets & currencies) despite changing correlations
- Return enhancers: Sec Lending, Hedged Swaps...
- More active management
- External mandates as diversifiers

### SUSTAINABLE AND RESPONSIBLE INVESTMENT (SRI) CONSIDERATIONS

- Climate change and NGFS recommendations: one of the greatest challenges for this century and a source of financial risk for central banks, who have accelerated action towards Climate Change mitigation
- The Eurosystem central banks have agreed on a common stance for applying SRI principles in the euro-denominated NMPP
  - ✓ aligned with NGFS recommendations
  - ✓ promotes disclosures and understanding of climate-related risks
  - Eurosystem to start climate-related disclosures for some NMPP in the next 2 years, using TCFD recommendations

# Banco de España has subscribed to the Eurosystem common stance

- In 2018, BdE joined NGFS and in 2019 incorporated SRI principles in NMPP investment framework
- BdE has direct green bond investments and participates in open-ended investment funds for green bonds launched by the BIS in different currencies
