Para: aloe.ecoplanet@ed.sm

Asunto: El jardín botánico

foto Aloe y planta carnívora.jpg

foto Con el árbol más antiguo.jpg

Hola, Aloe:

Te enviamos las fotos que nos hicimos el sábado en el jardín botánico.

Nos gustó mucho que te atrevieras a ver las plantas carnívoras. ¿A que no parecen tan peligrosas vistas de cerca? ;-)

Un beso muy fuerte,

Bego y Blanca

POLICÍA Y JUSTICIA

El hackeo de cajeros aumenta un 26% y ya mueve 332 millones de euros

- En 2015 se registraron 18.738 ataques a cajeros frente a los 23.588 del 2016, según la European ATM Security Team.
- Hackear un cajero solo cuesta 14 euros, según Kaspersky, la firma rusa de ciberseguridad. La técnica más empleada es el TRF: manipular el dispensador de efectivo.
- Te interesa leer: Desarticulada una red tras 200 ataques a cajeros en España mediante skimming.

Las pérdidas asociadas a este tipo de delincuencia **aumentaron un 2% interanual**, hasta alcanzar los **332 millones de euros** el 2016.

El método **black box**, que aumentó un **287**%, **58** bancos de 10 países europeos sufrieron ataques de este tipo.

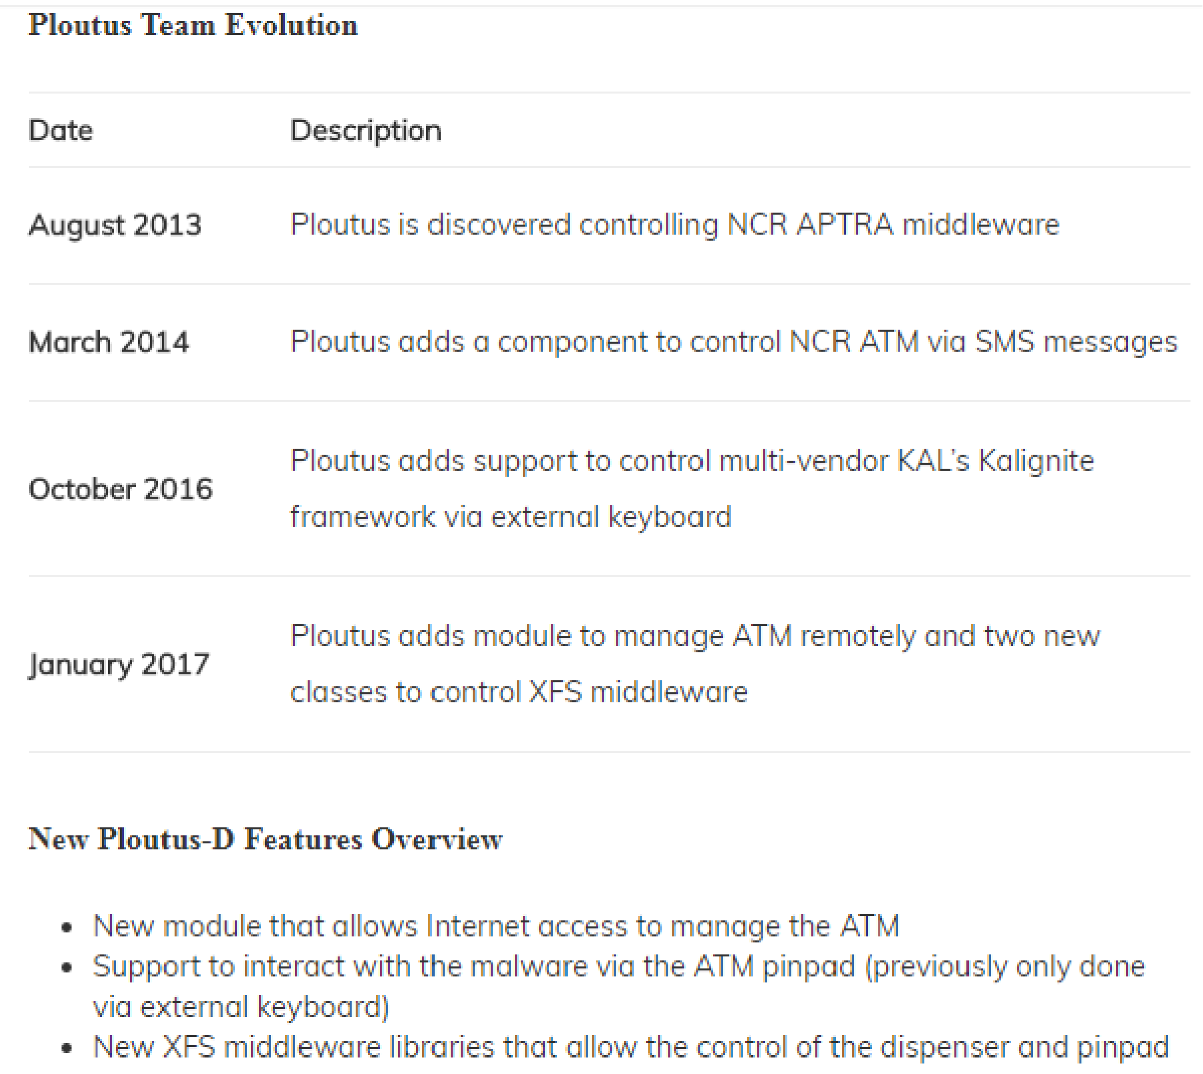
ATM’s Code Injection

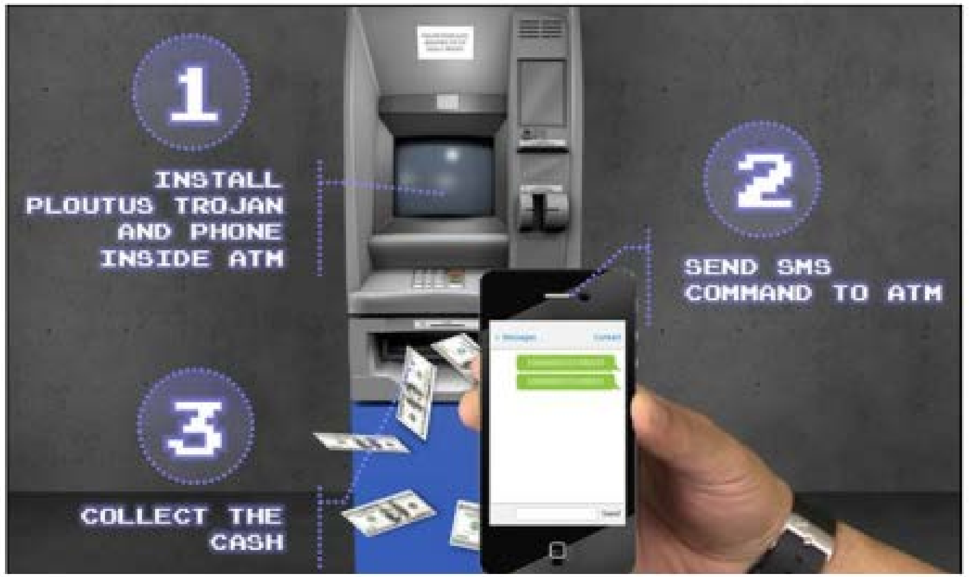


Ploutus Team Evolution

Date	Description
August 2013	Ploutus is discovered controlling NCR APTRA middleware
March 2014	Ploutus adds a component to control NCR ATM via SMS messages
October 2016	Ploutus adds support to control multi-vendor KAL’s Kalignite framework via external keyboard
January 2017	Ploutus adds module to manage ATM remotely and two new classes to control XFS middleware

New Ploutus-D Features Overview

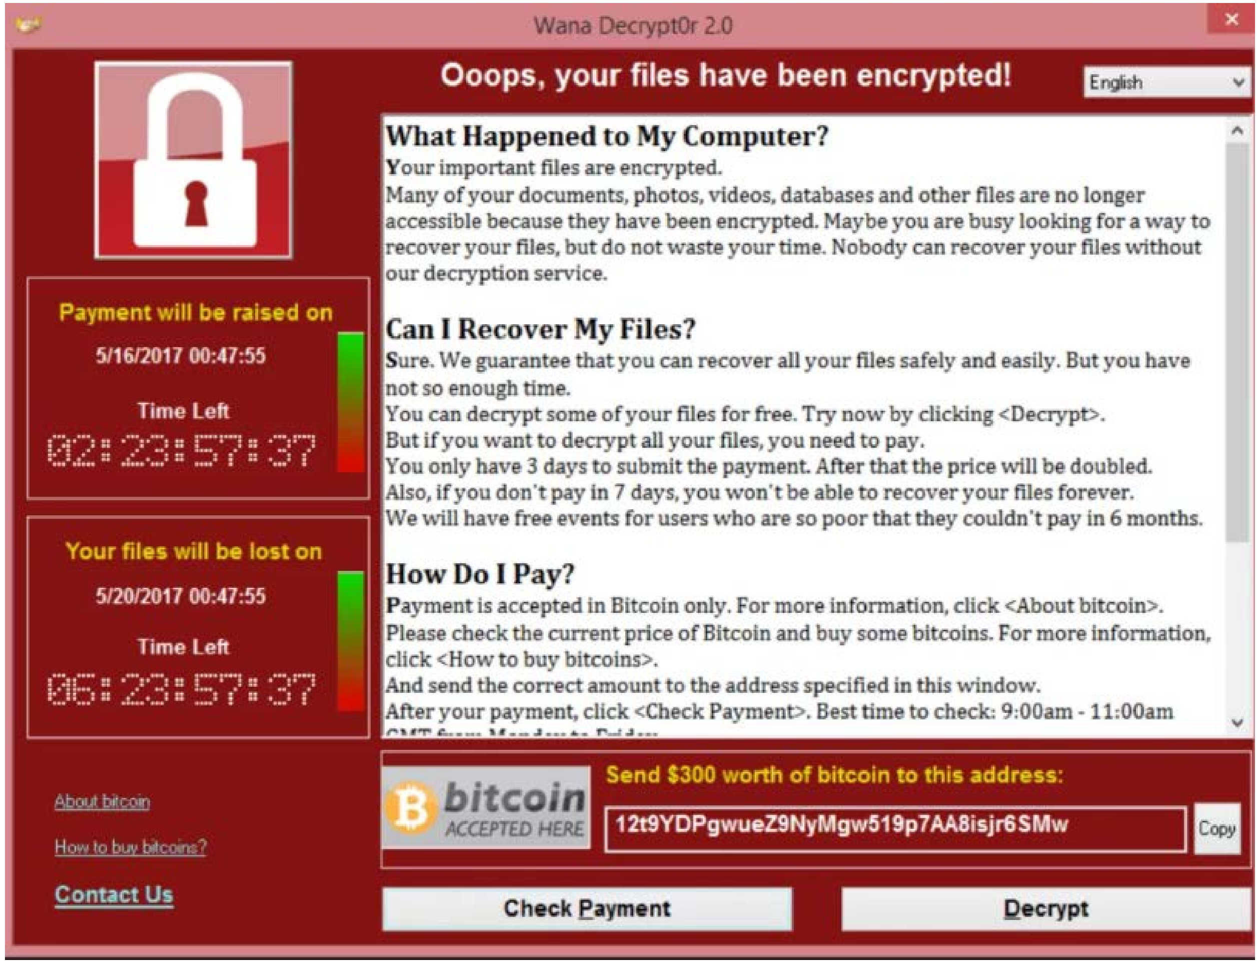
- New module that allows Internet access to manage the ATM
- Support to interact with the malware via the ATM pinpad (previously only done via external keyboard)
- New XFS middleware libraries that allow the control of the dispenser and pinpad



Although the Ploutus Team began by targeting Latin American countries, it now runs in multiple ATM vendors making it a worldwide issue and becoming the greatest ATM malware risk. Below is a list of countries that submitted a variant of Ploutus-D to VirusTotal:

- Mexico
- Peru
- Dominican Republic
- Ukraine
- Taiwan
- United States

Ransomware - Wannacry



Ooops, your files have been encrypted!

Payment will be raised on

What Happened to My Computer?

Your important files are encrypted.

Many of your documents, photos, videos, databases and other files are no longer accessible because they have been encrypted. Maybe you are busy looking for a way to recover your files, but do not waste your time. Nobody can recover your files without our decryption service.

Can I Recover My Files?

Sure. We guarantee that you can recover all your files safely and easily. But you have not so enough time.

You can decrypt some of your files for free. Try now by clicking <Decrypt>.

But if you want to decrypt all your files, you need to pay.

You only have 3 days to submit the payment. After that the price will be doubled.

Also, if you don't pay in 7 days, you won't be able to recover your files forever.

We will have free events for users who are so poor that they couldn't pay in 6 months.

How Do I Pay?

Payment is accepted in Bitcoin only. For more information, click <About bitcoin>.

Please check the current price of Bitcoin and buy some bitcoins. For more information, click <How to buy bitcoins>.

And send the correct amount to the address specified in this window.

After your payment, click <Check Payment>. Best time to check: 9:00am - 11:00am

Send $300 worth of bitcoin to this address:

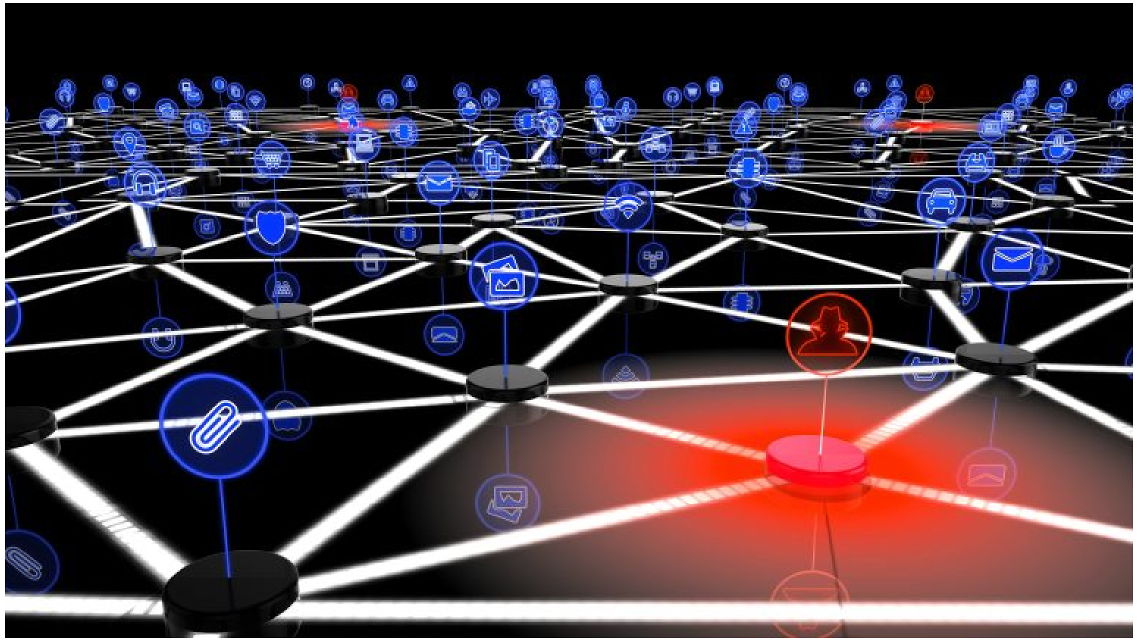
Already has 7,000 viruses that attack your devices

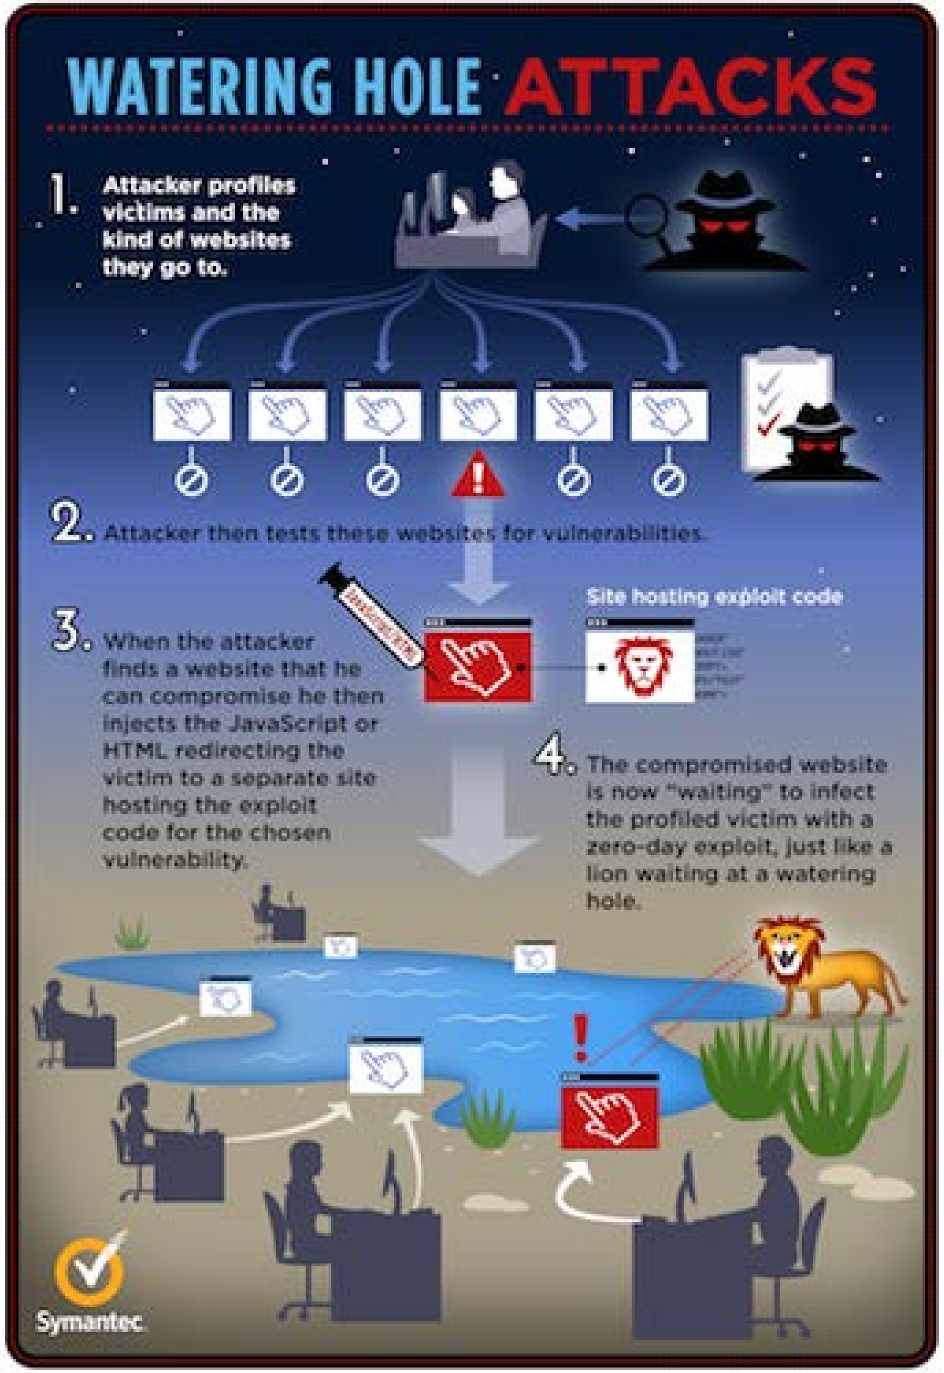
- Half of the viruses for these smart devices are dated 2017. That is, they are circulating for the first time.
- These malicious codes have been designed by cybercriminals to pirate devices, this serves to spy, extort and even involve people in blackmail.



Fuente: http://www.cioal.com/2017/06/23/iot-ya-cuenta-con-7-000-virus-que-atacan-sus-dispositivos//

New strategies cyberthreats

Cybersecurity not only refers to protecting itself as an entity, but also assessing the risks to which it is exposed. An entity does not work alone, it interacts with other institutions and that is where risk is transferred.



WATERING HOLE ATTACKS

1. Attacker profiles victims and the kind of websites they go to.

2. Attacker then tests these websites for vulnerabilities.

3. When the attacker finds a website that he can compromise he then injects the JavaScript or HTML redirecting the victim to a separate site hosting the exploit code for the chosen vulnerability.

4. The compromised website is now "waiting" to infect the profiled victim with a zero-day exploit, just like a lion waiting at a watering hole.

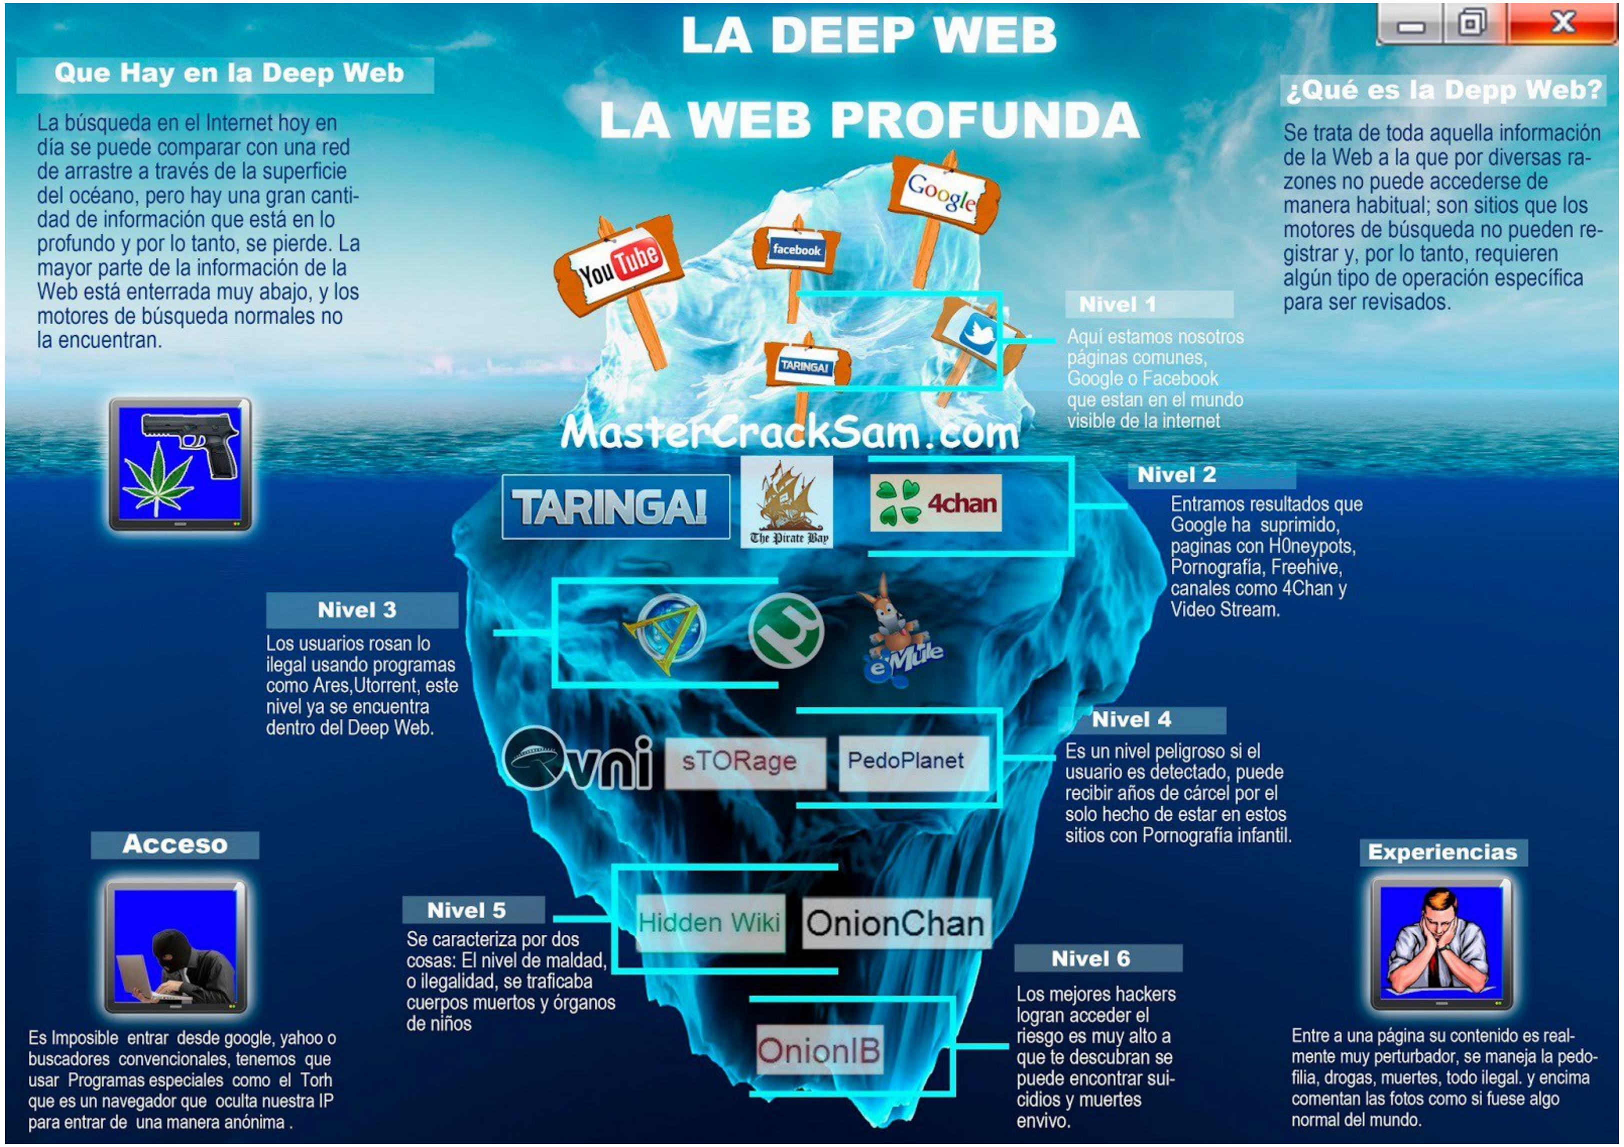
Deepweb operations



LA DEEP WEB

LA WEB PROFUNDA

Que Hay en la Deep Web

La búsqueda en el Internet hoy en día se puede comparar con una red de arrastre a través de la superficie del océano, pero hay una gran cantidad de información que está en lo profundo y por lo tanto, se pierde. La mayor parte de la información de la Web está enterrada muy abajo, y los motores de búsqueda normales no la encuentran.

¿Qué es la Depp Web?

Se trata de toda aquella información de la Web a la que por diversas razones no puede accederse de manera habitual; son sitios que los motores de búsqueda no pueden registrar y, por lo tanto, requieren algún tipo de operación específica para ser revisados.

Nivel 1

Aquí estamos nosotros páginas comunes, Google o Facebook que estan en el mundo visible de la internet

Nivel 2

Entramos resultados que Google ha suprimido, paginas con H0neypots, Pornografía, Freehive, canales como 4Chan y Video Stream.

Nivel 3

Los usuarios rosan lo ilegal usando programas como Ares,Utorrent, este nivel ya se encuentra dentro del Deep Web.

Nivel 4

Es un nivel peligroso si el usuario es detectado, puede recibir años de cárcel por el solo hecho de estar en estos sitios con Pornografía infantil.

Nivel 5

Se caracteriza por dos cosas: El nivel de maldad, o ilegalidad, se traficaba cuerpos muertos y órganos de niños

Nivel 6

Los mejores hackers logran acceder el riesgo es muy alto a que te descubran se puede encontrar suicidios y muertes envivo.

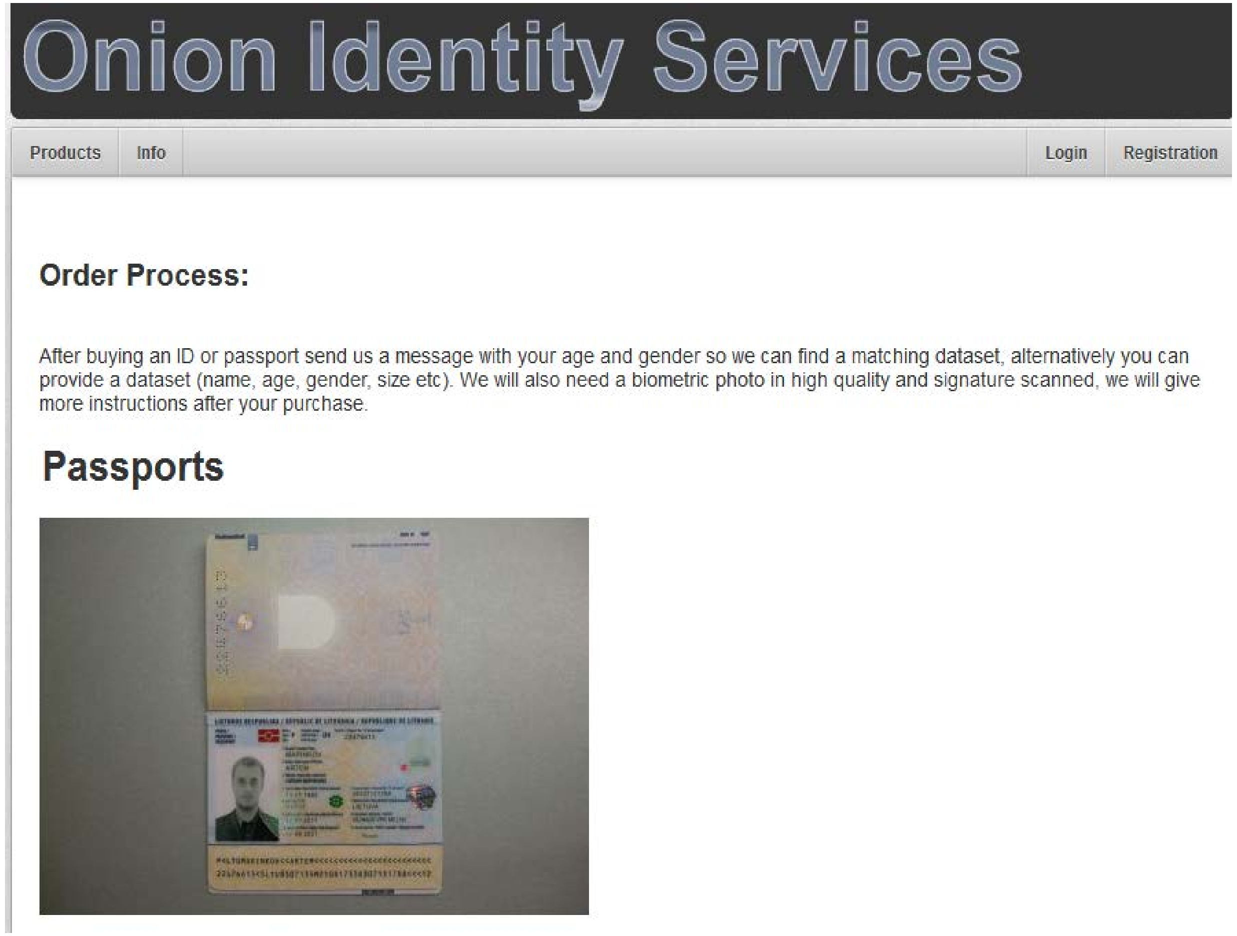
Acceso

Es Imposible entrar desde google, yahoo o buscadores convencionales, tenemos que usar Programas especiales como el Torh que es un navegador que oculta nuestra IP para entrar de una manera anónima .

Experiencias

Entre a una página su contenido es realmente muy perturbador, se maneja la pedofilia, drogas, muertes, todo ilegal. y encima comentan las fotos como si fuese algo normal del mundo.

Deepweb - identity theft



Order Process:

After buying an ID or passport send us a message with your age and gender so we can find a matching dataset, alternatively you can provide a dataset (name, age, gender, size etc). We will also need a biometric photo in high quality and signature scanned, we will give more instructions after your purchase.

Passports

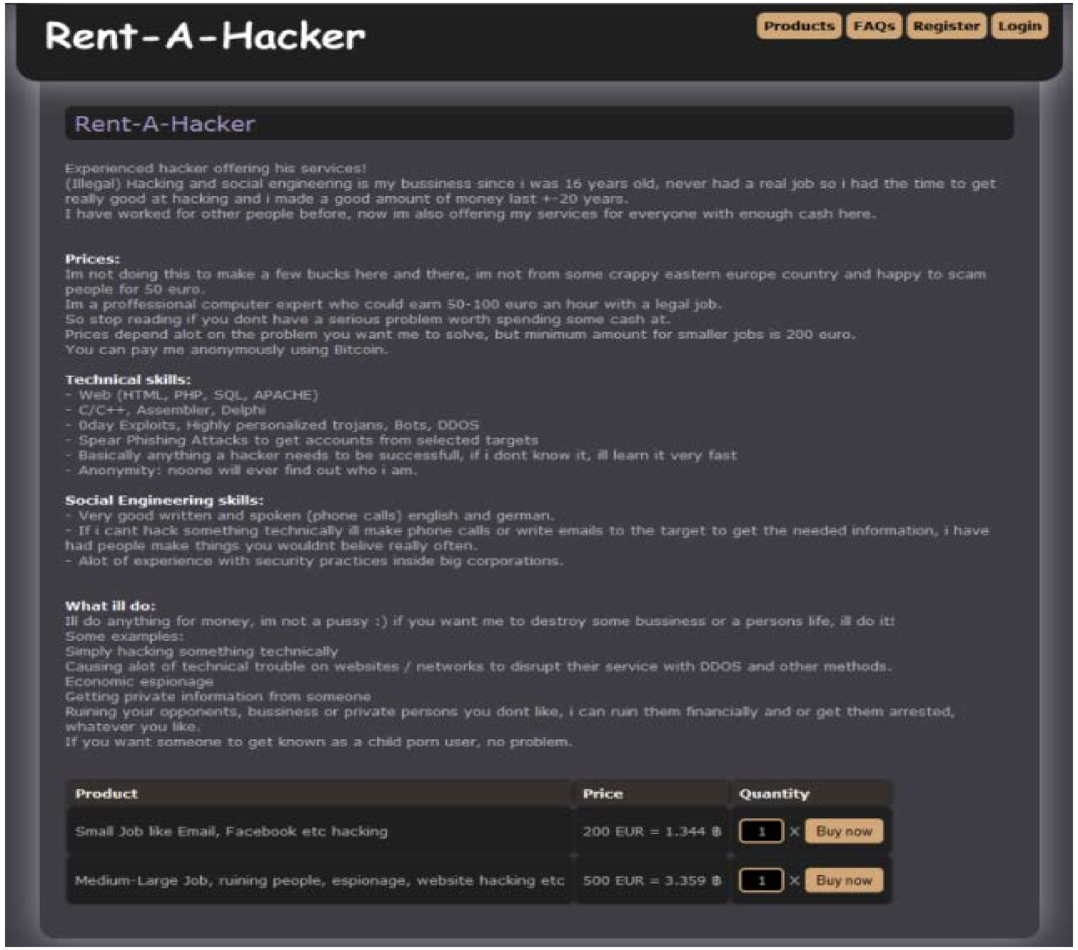
Netherlands Passport	3150 EUR = 1.493 Ƀ	1 X Buy now
Denmark Passport	3150 EUR = 1.493 Ƀ	1 X Buy now
Great Britain Passport	4000 EUR = 1.896 Ƀ	1 X Buy now
Canada Passport	2500 EUR = 1.185 Ƀ	1 X Buy now

Deepweb – Rent a hacker, dDoS



Rent-A-Hacker

Experienced hacker offering his services!
(Illegal) Hacking and social engineering is my bussiness since i was 16 years old, never had a real job so i had the time to get really good at hacking and i made a good amount of money last +-20 years.
I have worked for other people before, now im also offering my services for everyone with enough cash here.

Prices:
Im not doing this to make a few bucks here and there, im not from some crappy eastern europe country and happy to scam people for 50 euro.
Im a proffessional computer expert who could earn 50-100 euro an hour with a legal job.
So stop reading if you dont have a serious problem worth spending some cash at.
Prices depend alot on the problem you want me to solve, but minimum amount for smaller jobs is 200 euro.
You can pay me anonymously using Bitcoin.

Technical skills:
- Web (HTML, PHP, SQL, APACHE)
- C/C++, Assembler, Delphi
- 0day Exploits, Highly personalized trojans, Bots, DDOS
- Spear Phishing Attacks to get accounts from selected targets
- Basically anything a hacker needs to be successfull, if i dont know it, ill learn it very fast
- Anonymity: noone will ever find out who i am.

Social Engineering skills:
- Very good written and spoken (phone calls) english and german.
- If i cant hack something technically ill make phone calls or write emails to the target to get the needed information, i have had people make things you wouldnt belive really often.
- Alot of experience with security practices inside big corporations.

What ill do:
Ill do anything for money, im not a pussy :) if you want me to destroy some bussiness or a persons life, ill do it!
Some examples:
Simply hacking something technically
Causing alot of technical trouble on websites / networks to disrupt their service with DDOS and other methods.
Economic espionage
Getting private information from someone
Ruining your opponents, bussiness or private persons you dont like, i can ruin them financially and or get them arrested, whatever you like.
If you want someone to get known as a child porn user, no problem.

Product	Price	Quantity
Small Job like Email, Facebook etc hacking	200 EUR = 1.344 ฿	1 x Buy now
Medium-Large Job, ruining people, espionage, website hacking etc	500 EUR = 3.359 ฿	1 x Buy now

Final Comments

- Lack of understanding of the ecosystem in which we live
- We do what everyone else does and we expect different results
- Massive global attacks will continue. Impersonation will increase. User Profile admin must be assigned responsibly
- Buying zero-day vulnerabilities encourages search for new attack vectors
    - It was paid $ 1,000,000 for an iOS9 exploit, Exists an offer of $ 1'500,000 for an exploit of iOS10
- The increase in the incidence of collateral type attacks is anticipated
- There is a lot to do and it requires tools that allow you to be at the level that demonstrate the crime of the current attacks
- Networks must be segmented and verify that we have control of the backup
- Criminal organizations attack the financial system, do not focus on an entity, The need for IT security specialists is increasing day by day and the gap continues to increase, hence the need to form alliances for information exchange and collaborative monitoring
- Legacy systems prove to be a valuable target for crime because of the greater facility to attack them
- If we base our defense system on computer security programs and equipment; when something happens, it will be too late to react, we should orient our information searches and strategies in their origin
